Permeameter, Double-yoke plate, William F. Brown, Jr., and Sidney M. Rubens—713
Physical aspects of foaming in steam generation (Erratum), Hans M. Cassel—186
Physical chemistry, Frank H. MacDougall—88 (review)
Physical properties of elastomers at low temperature, H. E. Greene and D. L. Loughborough—3; Erratum—266
Physics, Message to all interested in, Homer L. Dodge—310
Physics in 1944, Thomas H. Osgood—61
Pigment dispersion methods for electron microscopy, H. C. O'Brien, Jr.—370
Plastics, High temperature, high pressure rheometer for, H. K. Nason—338
Plates and parallelepipeds, Virtual masses of rectangular plates and parallelepipeds in water, Yee-Tak Yu—724
Polarization factors, Correction of x-ray diffraction intensities for Lorentz and polarization factors, M. J. Buerger and Gilbert E. Klein—408
Pole figure, Validity of, Beulah Field Decker—309
Polymers, Determination of molecular-weight distribution in high polymers by means of solubility limits, D. R. Morey and J. W. Tamblyn—419
Polymers, Molecular weight studies on high polymers with the electron microscope, R. F. Boyer and R. D. Heidenreich—621
Polymers, Thermal expansion and second-order transition effects in high polymers, R. F. Boyer and R. S. Spencer 594
"Power function" for the determination of Lagrangian generalized forces, D. A. Wells—535
Printing inks, Relationship between the rheological properties and working properties of, Rolf Buchdahl and Joan E. Thimm—344
Prism, Small prism infra-red spectrometry, R. Bowling Barnes, Robert S. McDonald, Van Zandt Williams, and Richard F. Kinnaird—77
Proceedings of a conference on problems in the utilization of small coals, British Coal Utilization Research Association—312 (review)
Production and decomposition of ozone by low pressure mercury vapor lamps, L. R. Koller—816
Production histories of oil producing gas-drive reservoirs, Morris Muskat—147
Pyrex, Secondary electron emission of Pyrex glass, C. W. Mueller—453

Quartermaster Corps, Research in the military planning division—235

Radiofrequencies, Magnetic permeability of iron wires at radiofrequencies, Alva W. Smith, F. P. Dickey, and S. W. Foor—57
Radiofrequency resistance, Method of measuring the radiofrequency resistance of wires, Chandler Stewart, Jr.—608
Recent advances in ballistics, Staff of the Ballistic Research Laboratory—773
Refrigerator, Novel form of, W. D. Hayes—642 (L)
—— Arthur M. G. Moody—551 (L)
—— J. R. Roebuck—285, 846 (L)
Relationship between the rheological properties and working properties of printing inks, Rolf Buchdahl and Joan E. Thimm—344
Relativity, Wave guides and the special theory of relativity, W. D. Hershberger—465
Replica techniques, Electron microscopical replica techniques for the study of organic surfaces, R. Bowling Barnes, Charles J. Burton, and Robert G. Scott—730
Representation of rigid rotations (Erratum), E. T. Benedikt—551
—— H. Schwerdtfeger—571
Research in the Corps of Engineers, John W. N. Schulz—216
Research and development division, headquarters, Army Service Forces, R. M. Osborne—207
Research and development of materials for ordnance materiel, J. H. Frye—797
Research and development, military explosives and propellants, Miles W. Kresge—792
Research and development in the Ordnance Department, U. S. Army, G. M. Barnes—745
Research and development at Wright Field, F. O. Carroll—199
Research in the engineering and technical service, Signal Corps, G. L. Van Deusen, Victor A. Conrad, William L. Bayer, George Owen, and Gordon G. Irwin—244
Research—its coordination and application in the development of ordnance materiel, Scott B. Ritchie—747
Research in the military planning division, Quartermaster Corps, Georges F. Doriot—235
Research program of the Office of the Surgeon General, U. S. Army, Leon H. Warren—227
Research in the technical division, Chemical Warfare Service, W. C. Kabrich—211
Retraction and stress propagation in natural and synthetic gum and tread stocks, B. A. Mrowca, S. L. Dart, and Eugene Guth—8
Rheological properties, Relationship between the rheological properties and working properties of printing inks, Rolf Buchdahl and Joan E. Thimm—344
Rheometer, High temperature, high pressure rheometer for plastics, H. K. Nason—338
Rigorous treatment of the electrostatic immersion lens whose axial potential distribution is given by: $\phi(z) = \phi_0 e^{K \arctan z}$, R. G. E. Hutter—678
Rocket- or jet-bomb, Optimum height of flight of, M. Z. L. Krzywoblocki—275
Rockets and missiles, G. W. Trichel—764
Rubber, Retraction and stress propagation in natural and synthetic gum and tread stocks, B. A. Mrowca, S. L. Dart, and Eugene Guth—8
Rubber, Thermodynamics of rubber at small extensions, D. R. Elliott and S. A. Lippmann—50

Sampling inspection tables, Harold F. Dodge and Harry G. Romig—260 (review)
Secondary electron emission of Pyrex glass, C. W. Mueller —453
Semi-conductors, Basic principles of, Frederick Seitz—553
Semi-conductors, Electrical properties of, Robert J. Maurer—563
Shells, Extension of the beam theory to tapered beams and conical shells, Leon Beskin—511
Shorter history of science, Sir William Cecil Dampier—550 (review)
Signal Corps, Research in the engineering and technical service, G. L. Van Deusen, Victor A. Conrad, William L. Bayer, George Owen, and Gordon G. Irwin—244
Small arms and small arms ammunition research and development, R. R. Studler—760
Small prism infra-red spectrometry, R. Bowling Barnes, Robert S. McDonald, Van Zandt Williams, and Richard F. Kinnaird—77
Solution of the diffusion equation applicable to the edgewise growth of pearlite, W. H. Brandt—139
Specimen holders, Adaptation of special specimen holders to commercial electron microscopes, L. Marton—387 (L)
Spectra, Ultraviolet spectra of biologically important molecules, Gladys A. Anslow—41
Spectrometry, Small prism infra-red spectrometry, R. Bowling Barnes, Robert S. McDonald, Van Zandt Williams, and Richard F. Kinnaird—77
Stability of the low pressure mercury arc as a function of area at the cathode pool, Carroll W. Lufcy and Paul L. Copeland—740
Stability of low pressure mercury arcs as a function of current, Paul L. Copeland and W. H. Sparing—302
Steam generation, Physical aspects of foaming in (Erratum), Hans M. Cassel—186
Steel in action, Charles M. Parker—87 (review)
Strain hardening under combined stresses, W. Prager—837
Stresses and displacements in layered soil systems, General theory of, D. M. Burmister—89, 126, 296
Structure of certain muscle fibrils as revealed by the use of electron stains, C. E. Hall, M. A. Jakus, and F. O. Schmitt—459
Subharmonic response, Sustained subharmonic response in non-linear series circuits, Charles F. Spitzer—105
Surface reactions, Electron diffraction camera for the study of high temperature surface reactions, Earl A. Gulbransen—718
Surgeon General, Research program of the Office of, U. S. Army, Leon H. Warren—227
Sustained subharmonic response in non-linear series circuits, Charles F. Spitzer—105

Tank and automotive development, Joseph M. Colby—767
Technique of Motion Picture Production, Symposium of Papers Presented at the 51st Semi-Annual Convention of the Society of Motion Picture Engineers—87 (review)
Techniques for evaporation of metals, Leonard O. Olsen, Charles S. Smith, and E. C. Crittenden, Jr.—425
Theory of filler reinforcement, Jane M. Dewey—55 (L)
—— Eugene Guth—20
Thermal expansion and second-order transition effects in high polymers, R. F. Boyer and R. S. Spencer—594
Thermodynamics of rubber at small extensions, D. R. Elliott and S. A. Lippmann—50
Three-dimensional Fourier transforms and their application to Maxwell's equations, F. T. Adler—545
Time bases, O. S. Puckle—260 (review)
Tire cords, Comparison of some elastic properties of tire cords, Helmut Wakeham, Edith Honold, and Evald L. Skau—388
Tire cords, Effects of temperature and humidity on the physical properties of, J. H. Dillon and I. B. Prettyman —159
Transformer iron, Hipersil—a greatly improved transformer iron, T. D. Yensen—379
Treatise on the theory of Bessel functions, G. N. Watson —261 (review)
Triode tube mixers, Conversion diagrams for, Harry Stockman—639

Ultra high frequency radio engineering, W. L. Emery—261 (review)
Ultraviolet spectra of biologically important molecules, Gladys A. Anslow—41
U.S.S.R., Electrical research in the, Gerald Oster—121
Use of direct current in induction electron accelerators, W. F. Westendorp—657
Use of the electron diffraction camera to detect insulating films, Eileen I. Alessandrini—94

Validity of the pole figure, Beulah Field Decker—309
Virtual masses of rectangular plates and parallelepipeds in water, Yee-Tak Yu—724
Viscoelastic materials, Methods of specifying the properties of, Turner Alfrey and Paul Doty—700

War Department, Organization of the, and coordination of the general staff with operating divisions of the Army —190
Wave equations for finite elastic strains, Hubert M. James and Eugene Guth—643 (L)
—— A. Nadai—313 (L)
Wave guides and the special theory of relativity, W. D. Hershberger—465
Wires, Magnetic permeability of iron wires at radiofrequencies, Alva W. Smith, F. P. Dickey, and S. W. Foor —57
Wires, Method of measuring the radiofrequency resistance of wires, Chandler Stewart, Jr.—608
Wright Field, Research and development at, F. O. Carroll —199

X-ray, Design of x-ray powder cameras, M. J. Buerger—501
X-ray diffraction, Absorption displacement in x-ray diffraction by cylindrical samples, B. E. Warren—614
X-ray diffraction, Correction of x-ray diffraction intensities for Lorentz and polarization factors, M. J. Buerger and Gilbert E. Klein—408
X-ray diffraction study of the fatigue in metals at high stresses, Arthur G. Barkow—111
